

## brilliant

Home Control

Touch and voice control for lights, music, climate and more...directly from your light switch!

Colors

Brilliant replaces an existing light switch to give you touch and voice control of lights, music and other smart home devices. Want to play a Spotify channel on your Sonos? Just tap the screen. Want to dim lights? Just ask. It's a simple way to give everyone in the home easy access to smart home capabilities right on your wall.

Amazon Alexa is built in, so just ask for news, weather, and more to get both audio and visual responses. Keep your favorite settings in "scenes" to set the ideal mood for waking up, dinner time, or relaxing. There is even a video intercom built in with a privacy shutter for the camera.

Installation can be done in minutes – just replace an existing light switch (1, 2, 3, or 4 switch panel), connect to Wi-Fi, and Brilliant will begin detecting your smart home products for easy configuration. No new wiring or custom coding required!
